

Low Carbon Environmental Goods and Services Sector Study 2024: Local Authority Short Report for Wychavon District Council

Commissioned by the Midlands Net Zero Hub, this report provides 2024 data of the LCEGS sector, updating the 2021 study.

1. Introduction

This document has been prepared to provide an overview summary of the LCEGS sector within this Local Authority. Reports on the wider picture of the MNZH region and Worcestershire, including skills forecasts relevant to this Local Authority, and datasets are available [here](#). Additional detailed data is available from kMatrix; and further recommendations and details on areas of focus are available through the Climate Action Benchmarking study.

2. Current Activity Supporting the Growth of the Sector

Activity at the Worcestershire level relevant to the wider geographical region:

- Net Zero Worcestershire offers free advice, energy assessments and grants for energy efficiency and renewable energy measures to SMEs from all sectors in the region. This includes 75% funding grants of up to £100,000 for businesses wanting to install energy efficiency measures.
- [SkillsBoost Worcestershire](#) is a scheme run by the Worcestershire Growth Hub that helps organisations with the costs of upskilling and training their employees with a 50% grant. This can include improving net zero skills in a company or can be as broad as having a consultant come in to talk about sustainability for a day, both of which drive demand in the LCEGS sector.

3. Recommendations

Recommendations for Wychavon District Council are:

- Ensure businesses can access short term upskilling courses to give those in traditional sectors the knowledge to transition into the LCEGS sector, for example traditional plumbers retraining as heat pump engineers.
- Ensure rural LCEGS businesses are not being excluded from opportunities in the low carbon sector by directly marketing and tailoring support opportunities such as the Net Zero Worcestershire grant for quick, low-level interventions.
- Work with nearby local authorities to develop a strategy to better work with local skills providers, education institutions and LCEGS businesses to ensure training and apprenticeships are available that address the specific skills gaps in the area. This work could include pooling funding.
- Review procurement processes within the local authority and wider public sector to prioritise sustainable practices across the supply chain, thereby driving growth in the LCEGS sector. Shift focus from short term cost savings to longer term savings and consider savings to other budgets through procurement which brings social and environmental benefits.
- Contact the Midlands Net Zero Hub and request the supplementary booklet of additional data to provide further information and context to the LCEGS sector in your area.
- Large sub-sectors which saw stronger 3-year growth in Wychavon than the UK average and are considered strengths are:
 - Recovery & Recycling
 - Waste Management
 - Water Supply & Waste Water Treatment
 - Alternative Fuel Vehicle
 - Alternative Fuels
 - Building Technologies
 - Energy Management
 - Geothermal

These are similar strengths to the wider Worcestershire area, which also includes Nuclear Power. The Worcestershire report and dataset includes details of the skills gaps across Worcestershire for each sub-sector, providing evidence to feed into local skills plans, ideally formed in collaboration with neighbouring councils.
